

	QUALITY AND ENVIRONMENTAL MANAGEMENT SYSTEM POLICY according to ISO 9001, ISO 14001
	Issued by: Company management Date: 01/10/2018

AB CHEMITRADE, s.r.o., is a reliable business partner with long-lasting experience in the field of wastes, chemicals, industrial raw materials and forwarding services. We do not use our professional experience only on the domestic, Slovak and Polish markets, but also in the markets of the other EU member states. The company is committed to its further development, continuous quality improvement of products and services for all-round satisfaction of presumed needs of our customers and compliance with legal regulations.

The management assumes liability for the environmental protection in relation to its business activity in the field of electrical equipment. It recognises the need for improvement of environmental management as one of the highest priorities of the company.

To strengthen the environmental protection, the company management decided to check and minimise potential risks of polluting any component of the environment by introducing an integrated system according to ISO 9001 and ISO 14001. Environmental protection and creating safe working conditions for its employees are permanent priorities of the company.

To fulfil them, the management of AB CHEMITRADE, s.r.o. adopts the following principles:

- ☐ Contribute to continuous improvement of the integrated system according to ISO 9001 and ISO 14001, and to the prevention of environmental pollution.
- ☐ Comply with legal and other requirements.
- ☐ Satisfy customer requirements in the new production.
- ☐ Increase awareness of employees of environmental protection by educating them, and carry them over to closer cooperation.
- ☐ Strive to prevent occurrence of emergency situations, and if they occur, proceed in accordance with emergency plans which ensure that adverse impacts on the environment are limited.
- ☐ Assess impacts on the environment when the technology is being changed before its introduction.
- ☐ Influence our suppliers to be also environmentally friendly.
- ☐ Strive for minimising adverse impacts of our own business, products and services on the environment within the process of improvement of the integrated system.
- ☐ Place emphasis on the prevention of accidents in the production, and potential adverse impacts on the environment.
- ☐ Strengthen an open attitude and dialogue with our employees, general public and other stakeholders in acceptance of ideas, and respond to them.
